Your full in-house technology partner

A presense worldwide

Our aim is simple: to deliver the best possible solution for your process..

Working closely with you, we design our equipment to ensure you get the most efficient solution suited to your objectives.

Thanks to our inhouse expertise and know-how of upstream and downstream processes, we can help you apply the most advanced technology to developing commercially viable production facilities. Our experts design, engineer, manufacture and install state-of-the-art, hygienic, stainless-steel process plants of the highest quality.

Decades of experience

We established SiccaDania for the sole reason of being a partner for the customer by creating the solutions our customers want and need.

From the humble beginning with no more than 10 people, we can now proudly boast a global footprint with offices in France, Germany, The Netherlands, Poland, Singapore, China, Brazil and Canada, and more than 500 employees.

Our bag filters

We provide premium quality bag filters for powder recovery within the dairy, food, chemical, cosmetic and pharmaceutical industries.

As bag filter supplier we offer:

- Higher product recovery
- Lower emissions
- More energy-efficient production
- Easier to clean
- More flexibility
- Standard design or tailor-made

We have the capability to engineer, manufacture, install and commission the bag filter, covering the whole value chain. This ensures optimal solutions, short delivery, full flexibility, and enhanced quality control.

Upgrade of old filters

SiccaDania provides state-of-the-art upgrades and optimisation of old and rigid bag filter installations to ensure hygienic and safety requirements or to increase their capacity. Our experienced team ensures eminent technical support and access to spare parts for all bag filter types.

Developed to efficiently recover powder from the production exhaust

Experience meets innovation

Our innovative bag filters have a high separation efficiency and are thereby ensuring higher product recovery and lower emissions when used in production with equipment such as fluid beds, powder conveying, packing systems etc.

Pulse-jet bag filters

SiccaDania pulse-jet bag filters are designed in a variety of sizes. These pulse-jet bag filters have been in operation worldwide for decades to separate dry products from gas type media in various industries such as the food, feed and (petro-)chemical industry.

Sanitary bag filters

SiccaDania bag filters are characterized by an optimized sanitary and hygienic design. The air and powder flows inside the filters are thoroughly studied and ensures a long bag life time. The filters are easy to maintain and have a low energy consumption. Moreover, the bag filter can be executed with optional CIP and fluid bed powder discharge.
